

CPSIA - Consumer Product Safety Improvement Act

TERRITORY

USA

RESTRICTION SUBJECT

Limits for lead contained in components intended for children's fashion jewellery

A U.S. federal law „Consumer Product Safety Improvement Act“ known as CPSIA came into force in 2009. Based on this law it is impossible to sell fashion jewellery containing more than 100 ppm of lead (0,01%) to children under 12 in the USA as from 14 August 2011.

Requirements of this standard are fully met by products with pictogram Lead Free Brilliance.

Some states, such as California and Illinois adopted further stricter legislative measures beyond the requirements of CPSIA, aimed at reducing the potential negative impacts arising from an excessive use of lead in consumer products including fashion jewellery for children. Preciosa crystal glass melts do not meet this stricter required legislative.

For a summary of legislative norms regulating the fashion jewellery production sector please visit:
